NUR-SULTAN – Jezkii̇k Ulfyat festival brought together the Ulfyat External Relations, the International Rural Youth Festival, and the Ulfyat National Food Festival on Aug. 23–25.

Located at the intersection of several ancient civilizations and the largest transport arteries, Kazakhstan for centuries remained one of the most important harbours and spiritual centres of the Eurasian continent, and Kazakh President Kassym-Jomart Tokayev in his speech at the Aug. 24 panel on the role of Kazakhstan’s historical and cultural legacy in tourism development at the Ulfyat International Tourism Forum.

“Among the sacred places of our country, a special place is occupied by the lands of Ulfyat. This is a sac- red cradle of the Kazakh people, a symbol of the unity of the nation and a force for struggle for independence. And today, one of the important tasks of tourism development is to promote the touristic potential of this sacred place,” he said.

Tokayev also announced the opening of the Tourist University, which will train personnel for the tourism industry as well as prepare specialists for the tourism sector, and the creation of an informational and analytical centre to promote tourism development in the country.

The festival included the opening of a Translation Centre of the Eurasian continent,” said the activist.

The festival also included the opening of a Translation Centre of the Eurasian continent,” said the activist.

Tourism development at the Ultytau centre of the Eurasian continent,” and tourism development, including interesting places and modern tourism centres.

In the first part of the forum, tourism companies and industry experts discussed the role of Kazakh tourism’s history and culture in its tourism industry.

They discussed topics, including challenges facing Kazakh ethnocultural tourism development, and the Ultytau region archaeological findings.

The Silk Road tourism development expert of the United Nations World Tourism Organization Aliyev talked about global trends in the tourism industry and how the Central Asian region could organise itself. He emphasised the emerging trends of sustainability and local experiences, arguing that Central Asian countries had a great potential in incorporating these trends in their tourism agendas.

Singaporanese investors hope to invest $200 million in constructing Nur-Sultan educational technologies

By Dikbat Zhamzhanov

Nur-Sultan – Singaporean investor Global Investment Roundtable has planned to invest over $200 million in constructing educational technologies in the capital, reports the daily admistrative information.

The Singaporean company Kindergarten and primary school will be built in the capital as part of the first stage of project implementation, after which a secondary school will be constructed.

A college and university will be built during the third stage.

The head of the firm noted that attracting investment is a key priority, especially in education. The capital is particularly favourable place for attracting investment, said Nur-Sultan Alimov (Mayor) Akylzhanov.

For example, TAMKAS (EURASIA&WORLD) 2019 investment to construct a private school with a physics and mathematics emphasis. SABIS will build an international school by 2022, creating 1,000 jobs and 250 kindergarten places and 250 primary schools, which will cost $1.5 million. EURASIA&WORLD 2019's expansion will create 120 kindergarten places and 250 primary school places.

Nur-Sultan had 108 schools with 120 kindergarten places. 2022 will see 111 schools with 120 kindergarten places. The sides also noted that Vice President of the German Bundestag Manfred Grund and Parliamentary Friendship Group, Bundestag Deputy Manfred Schulz and Parliamentary State Secretary at the Federal Ministry for Economic Affairs and Energy Thomas Bareiss.

During these talks, Almaty mayor had discussions with the German officials, including Head of the German-Central Asia Parliamentarian Friendship Group, Bundanking Deputy Marshal Ursula von der Leyen and Parliamentary State Secretary at the Federal Ministry for Economic Affairs and Energy Thomas Bareiss.

The side also noted that Vice President of the German Bundestag Dr. Hans-Peter Friedrich is expected to meet with Kazakh Prime Minister, Deputy Marshal Ursula von der Leyen and Parliamentary State Secretary at the Federal Ministry for Economic Affairs and Energy Thomas Bareiss.

As the first stage of the project started, the capital is particularly favourable place for attracting investment, said Nur-Sultan Alimov (Mayor) Akylzhanov.

PM visits Kostanai Region, examines region’s industrial development

By Diana Vassilenko

NUR-SULTAN – Prime Minister Askar Mamin visited the Kostanai Region Aug. 15-16, when he was briefed on the progress of the region’s industrial and infrastructural development. Mamin visited the Novo-Kostanai microdistrict in Zarechnoye village, which is part of the North Zhailau Housing Programme, 279 houses under construction there.

“Now, there are no problems with an average of 100 and 120 square metres in the microdistricts. There are both single-story and two-story types,” Deputy Akim (Governor) of the region Semyd Knyzybekov said.

“There is an additional 10 series of land to each house and each square metre (US$10.16) per one square metre. The development is provided by a 15-year loan at an interest rate of 6 percent,” Knyzybekov added.

The state allocated 2.2 billion tenge (US$6.7 million) to the construction of this apartment. Another 2.7 billion tenge (US$8.2 million) is allocated for the infrastructure development.

“The ONLY thing we have to worry about is the water and gas supply and have been supplied by the utility companies, which have completed the remaining 70 percent of the houses,” Knyzybekov said. He said the housing project is progressing well, as they are in great demand. Mamin also visited an art exhibition by the Astana Weavers. Despite all four of them having more than 20 years of experience with their crafts, the artists create applique panel-style artworks. What makes their artwork unique is that the weavers interweave both their traditional designs with their own creative appreciation for the new. Mamin headed over to the Zarechnoye microdistrict with his motorcade, which is 24km away from the city. Zarechnoye is a residential area in the Kostanai Region. Governor Salyh Turoki said the residents are being housed in Zarechnoye.

If implemented, the controls over the 10 food items would add to the first measures to maintain prices, which began Aug. 16 with amendments to the Internal Trade Rules, which ban a price increase of more than 15 percent for socially significant food products.

Inflation rose to 10.4 percent year-over-year (yoy) in July, compared to 9.9 percent in June 2019. The harmonized rate of consumer price index decreased 0.5 percent to 103.3 percent in July 2019, compared to the same period of 2018.

“Among them are food products, whose cost is 58.8 percent. This is the highest cost of all the products,” Akim of the East Kazakhstan Region Daniyal Akhmetov, as well as Minister of Industry and Infrastructure Development Roman Sklyar, Minister of Agriculture Askar Mamin and Deputy Akim (Governor) of the region Semyd Knyzybekov said.

“The automotive industry, one of the main factors that drive the nation’s economic development and the development of the region’s economy. Minzistr Mamin directed Sultanov to develop a unified mechanism for the prices of goods and services. The changes also supported domestic firms to access at least 30 percent of shelf space in shopping centers.

In addition, the amendments provide for the enforcement of anti-dumping duties on suppliers by retail chains. The following day, the government began adjusting the Model Rules for the Implementation of Anti-dumping and Countervailing Measures for the Protection of Socially Insignificant Food Products. According to the rules, retailers (city and regional administrations) and their socio-entrepreneurial partners can provide warehouse capital to social trade to maintain prices.

“So, we can provide 88 percent for socially significant food products, whose average price is 58.8 percent,” Akhmetov said.

“The first measures to maintain prices, which began Aug. 16 with amendments to the Internal Trade Rules, which ban a price increase of more than 15 percent for socially significant food products,” Akhmetov said.

ECONOMY

NEWS IN BRIEF

Kazakhstan’s employed popula-
tion increased by 3 percent year-over- year (yoy) from January-July 2019, or 607,000 people compared to the same period of 2018. Of this figure, 66.7 percent of those aged 15 and over are employed.

Total employed workforce comprised of 11.1 percent (1.51 million) of the young people aged 15 to 29 years (1.51 million), of which 60.1 percent (906,950 people) are employed in the education sector, and the lowest is in trade, repair of motor vehicles and personal and household services (1.1 percent, or 1.67 million people), followed by industry (2 million), and wholesale and retail trade (1.9 percent, or 2.8 million people).

The prime minister discussed the automobile industry and agricultural machinery manufacturing with Minister of Industry and Infrastructure Development Roman Sklyar, Minister of Agriculture Askar Mamin (Governor) of the Kostanai Region, Architectural Masterplan Kostanai Akim of the East Kazakhstan Region Ermal Aldemirov, as well as the heads of several enterprises, including President of Astana Group Nur-Sultan Smagul, Chairman of the Board for the KAMAZ Group KAMZ, Deputy Director General Volgogradskiy Autoexport and Export Corporation Wu, Director of Petersburg Sky-Traffic Zavod Yury Sosnovsky and CEO of Gumataliev Alexander.

The automotive industry is one of the main factors that drive the nation’s economic development and the development of the region’s economy. Minzistr Mamin directed Sultanov to develop a unified mechanism for the prices of goods and services. The changes also supported domestic firms to access at least 30 percent of shelf space in shopping centers.

Recent AIFC advances will make AIFC country's main financial platform

By Dessana Nurgaliyeva

Prime Minister of Kazakhstan Askar Mamin officially launched on Aug. 20 the second set of amendments to the AIFC Act just before 70th anniversary of the first nuclear test. The amendments were developed in accordance with the roadmap items will increase by introducing an online platform for electronic trade with novice entrepreneurs.

According to estimates, the global e-commerce market will grow from $3.2 trillion in 2018 to $6.5 trillion by 2021, representing a 24% increase.

The final primary focus will be on investment attraction and promotion and c-commerce platforms on which consumers can find products, compare prices, and make purchases online. Consequently, the engagement of large, local and international e-commerce players is crucial for the success of the new initiative.

For there is nothing at all to be gained by enduring poverty. There is not a single day since the last test took place on 70th anniversary of that first fateful explosion that Kazakhstan has not been faced with this fate.

For there is nothing at all to be gained by enduring poverty. There is not a single day since the last test took place on 70th anniversary of that first fateful explosion that Kazakhstan has not been faced with this fate.

In the years that have followed, the country has been forced to follow a series of measures to permanently stop nuclear tests and create a world in which these weapons are considered unnecessary. Kazakhstan has been one of the most tireless supporters of the Comprehensive Nuclear Test Ban Treaty (CCTB).

The second type of the programme, which is the investment in e-commerce programme.

International investors explore opportunities in Kazakhstan at Caspian Economic Forum

By Dilshat Zhussupova

NUR-SULTAN – Kazakh Invest officials presented investment opportunities for foreign companies Aug. 11-12 at the First Caspian Economic Forum held in Turkmenistan, reported Invest.gov.kz.

Kazakh Invest, established with Turkish company Çalık Holding, aims to cooperate in the textile industry. The CEO of Çalık Holding, Oleg Korobchenko, who is 30 years old, said that the company is actively engaged in meat processing and aims to increase exports to 4,000 tonnes by the end of 2019.

The company met with Turkish companies and has production facilities in Azerbaijan, Iran, Kazakhstan, Russia and Turkmenistan. Kazakh Invest also plans to cooperate in the meat processing industry, having an exclusive supply agreement with AkTep, which has been funding the project.

The Agribusiness Corporation (ACC) financed the purchase of more than 5,000 heads of pedigree cattle from Australia, the United States and Indonesia. The project is expected to increase the breeding stock of beef cattle in the AkTobe and West Kazakhstan regions. The corporation is also developing a new model to ensure public procurement.

Aktobe Meat Cluster is an export-oriented, meat-processing plant specialising in high-quality beef. The enterprise is the third largest in the country in terms of wages and protecting local goods. The company hopes to increase exports to 4,000 tonnes by the end of 2019.

By Aidana Yergaliyeva

Aktobe Meat Cluster and AkTep meat-processing complex is the first in the region that supplies high-quality beef to China, the official said. The cluster has a plant specialising in high-quality meat products to other Central Asian countries.

In addition, Russian company Schelfishko Agrofirm, which is the largest producer of potatoes, is interested in increasing its production capacity of meat products. The company is interested in establishing a cooperation agreement with the AkTobe Meat Cluster.

Kazakh Ministry of Agriculture and Rural Development Director General Aidana Yergaliyeva said that the market for meat products will increase in the future, and the meat cluster is an example of successful development.

The project is expected to increase the breeding stock of beef cattle in the AkTobe and West Kazakhstan regions. The corporation is also developing a new model to ensure public procurement.

This will create poultry farms in the region that will supply high-quality beef to the feedlot and meat processing plant year-round without capital investments from AkTep.

Aktobe Meat Cluster and AkTep meat-processing complex is the first in the region that supplies high-quality beef to China, the official said. The cluster has a plant specialising in high-quality meat products to other Central Asian countries.

In addition, Russian company Schelfishko Agrofirm, which is the largest producer of potatoes, is interested in increasing its production capacity of meat products. The company is interested in establishing a cooperation agreement with the AkTobe Meat Cluster.

Kazakhstan digitises public procurement to increase transparency and competition

By Adile Verjukova

NUR-SULTAN – The Aktobe Meat Cluster and AkTep meat-processing complex, drenched Aug. 11 in a new round of a dispute over the supply of vacuum-packed frozen beef worth 2.21 billion tenge (US$5.5 million) to China, reported the press service of the Kazakh Ministry of Agriculture.

As the co-operation on the supply with AkTep failed, the option of concluding a contract with another source was ruled out since July 1, "to promote fair competition," said Beketayev on regulatory measures implemented this year. "As a result of the new regulations, there was a sharp decrease in the share of public procurement of failed purchases from a single source to 5.1 percent in 2018 to 7 percent in January-July, which saved 233 billion tenge (US$573.5 million) in public procurements."

"This year, we are considering the possibility of investing in Kazakhstan, for the sake of a reliable local partner," said Oleg Korobchenko, Deputy General Manager of Istanbul Meat Cluster, which exports meat to Kazakhstan.

With the help of Kazakh Invest, which organises investment projects in Kazakhstan, the Russian company Lighting Technologies intends to build a production plant for lighting and control systems in the Almaty region and expand the plant’s products to other Central Asian countries. In addition, Kazakh company Schelfishko Agrofirm, which is the largest producer of potatoes, is interested in increasing its production capacity of meat products. The company is interested in establishing a cooperation agreement with the AkTobe Meat Cluster.

Kazakhstan is a promising market for us. We are ready to cooperate with Kazakh Invest and consider investment opportunities in our field," said Kuruib Group of Companies Chief Executive Officer Oleg Korobchenko.

The Caspian Economic Forum gathered representatives of Azerbaijan, Iran, Kazakhstaz, Russia and Turkmenistan for the first time in a five-day event since they signed a convention on the legal status of the Caspian Sea Aug. 12, 2018 in Kazakhstan. Kazakh Prime Minister Askar Mamin and Turkmen President Gurbanguly Berdymukhamedov also met as part of the forum to discuss cooperation in industrial, chemical, metallurgical, agriculture, tourism, transport and gas, reports Primeminister.kz.

Trade between Kazakhstan and Turkmenistan was $68 million in the first half of the year, which is 2.2 times more than in the same period last year. Developing initiatives, such as the new Coordinating Council, chaired by Mamin and aimed at attracting and protecting foreign investment, will be an additional instrument for change, the prime minister said.

Kazakhstan leads among CIS countries in attracting international development bank loans

International development banks provided $874.5 million of loans for Kazakhstan's projects in January-June, which is a 44.9-percent increase from the same period last year, when $603.5 million was approved. The EBRD provided $182.9 million in loans for the country's projects in January-June and $10 million in loans in the same period last year. The EBRD, Asian Development Bank and the International Finance Corporation provided $562.6 million in loans for the country's projects in January-June, which is a 44.9-percent increase from the same period last year, when $603.5 million was approved. The EBRD, Asian Development Bank and the International Finance Corporation provided $562.6 million in loans for the country's projects in January-June, which is a 44.9-percent increase from the same period last year, when $603.5 million was approved.

With 24.9 percent, Kazakhstan exhibited the largest share of approved investment project funding among CIS countries. Eight projects worth $237.1 million were approved for funding in the country in the second quarter of the year. Russia followed closely behind with a 24.7-percent share of approved investment project funding and five approved projects worth $235.5 million. Ukraine closed the top three with a 23.5-percent share of project funding and projects worth $243.4 million.

International development banks approved project funding of $1.1 billion in Kazakhstan's private sector in April-June, which is a 13.3-percent increase from the period of 2018. The EBRD and ADB provided $51.8 million and $10 million in loans in the second half of the year, respectively.

Petropavlovsk company begins producing refrigeration cars

By Yuribek Vahlkanov

NUR-SULTAN – Petropavlovsk Heavy Engineering Plant has begun producing refrigeration cars to transport short-lived commodities. The company plans not only to satisfy local demand, but also export cars to Russia.

The plant is cooperating with Cool Infinity Engineering Corporation, according to the general director Vadim Shukolov-Kucher.

“Using our own efforts of the engineering centre, we designed a plan beach rig. We understand what each stage of the technological production of wagons is associated with. We are ready for a dialogue about serious sales volumes with our potential partners. It is important that the project allows extending production,” he said.

Cool Infinity General Director Valentin Karpin noted his company’s interest in many enterprises before selecting a partner.

“We chose Petropavlovsk Heavy Engineering Plant as having the necessary potential. The plant has highly qualified specialists – welders and fitters. It has good potential in the design and technology of wagons. All this allowed us to start production of the cars in a short period of time and since February we have established assembly line and obtained a certificate of conformity,” he said.

Atamekan National Chamber of Entrepreneurs Deputy Chairman Ergysyn Bolgert also visited the facility, reported Kazinform.

The plant uses modern technologies corresponding to ASME (American Society of Mechanical Engineers), API (American Petroleum Institute), GOST (State Standard of the Russian Federation), etc. The company agreed to share its own efforts of the engineering centre, we designed a plan beach rig. Nazarbayev University hosts Harvard University’s largest student-run conference in Asia

By Josef Semenishyna

NUR-SULTAN – Nazarbayev University (NU) hosted the 19th Harvard Project on Asia – Strategic and International Relations Conference (HPAIR) gathering 800 students from the world’s top universities to address emerging challenges in the Asian region.

Organised since 1991, HPAIR provides a platform to students to discuss political social and economic issues facing the Asia Pacific region.

HPAIR hosts two conferences every year – one at Harvard and one in a host city in Asia. The conferece has been to 107 countries involving more than 10,000 students from across the world.

Nazarbayev University won a six-month intensive and highly competitive bidding process, winning the right to host the conference for the first time in Central Asia, enabling it to tap the huge opportunities the region presents.

“By hosting our conference, NBU is adding to its mission of becoming the region’s leader of educational institutions that are fostering a new generation of leaders of Asia” said Michael Christ, NU’s president.

Akkkam Khan singing dune fascinates tourists with mystic sounds, legends

By Salaman Benta

NUR-SULTAN – The Akkkam Khan singing dune in Almaty’s Emel National Park attracts tourists with its mystical, melodious sounds. The sounds are rooted in several legends.

The dunes, approximately 150 metres high, are the closest such pure dunes near the Elbe River between the two ridges of the Emel Alatau, Kyzyl-Kul and Ush Kankan mountain. It stretches for nearly three kilometers and is the only dune ridge really dust covered with unusual and small dunes, which makes one wonder how it was formed and why it has not been blown away by the steppe wind, reported kryshaw.kz.

Akkkam Khan was created as a result of the strong Shilik wind that blows towards the Kyzyl-Kul and Ush Kankan ridges. The gust brings dust clouds from the shallow Elbe River; it reaches the dunes, it weakens and the sand column becomes thinner, forming the dunes. During the other winds, the millions-long pressure constrains the sand mound to stay firmly in place, despite the ferocity of the wind and sun, allowing it to gain such impressive dimensions.

Golovkin to face Deryanchenko in New York for vacant IBF World Middleweight title

By Diana Vasilekova

NUR-SULTAN – Gennady Golovkin will face Sergiy Deryanchenko in New York on Oct. 5.

“On Oct. 5, it’s going to be a good fight. It’s going to be a really good showcase,” Golovkin said in an interview for this story.

Golovkin had never been to Central Asia was looking forward to proving in the ring that I will be up to challenge everyone to bring back the big drama show in the ring. He defended it three times before being stripped in spring 2018, after Canelo Alvarez pulled out of a scheduled rematch in May. Deryanchenko was determined, according to bad Left Hook journalist Scott Christ.

“I’m very excited that my team has secured another opportunity for me to fight for the middleweight championship of the world,” said Deryanchenko.

The champ of the clash will be live on DAZN, the sports streaming platform.

Nevada-Semipalatinsk activists to release book about initiatives in building nuclear weapon free world

By Zilzana Shaerbaizhina

NUR-SULTAN – Vice President of the Nevada Semipalatinsk movement Sultan Kartoev and teacher at Nazarbayev Intellectual School Akkkam Khan released in December a book titled “Kazakhstan is an arrow of the first nuclear weapon free world.”

The release of the book was associated with the 70th anniversary of the first nuclear explosion at the Semipalatinsk Test Site located 150 kilometers west of the village of Semey.

Approximately 1.5 million Kazakh people have suffered as a result of the 456 nuclear tests conducted at the Semipalatinsk nuclear test site since 1949.

“This is a unique book as it contains all the materials related to the Nevada-Semipalatinsk movement. Kazakhstan is an arrow of the first nuclear weapon free world,” said Kartoev in an interview for this story.

Young people learn family values, acquire sense of environmental responsibility through social life, says Slavic community leader

By Slaikhat Biron

People
B2 NATION & CAPITAL

Potential students. I believe there are thousands of young people with unique crafting talents in Kazakhstan, but the sense of responsibility for their own craft and the nation's culture is weak. This is a custom in many countries for the older generation to pass their skills to the younger generation. First and foremost, the younger generation should understand the importance of their culture and tradition and learn these from their ancestors.

Anyz Tulga project. Her unique craftsmanship and art were recognized in 2012 and are preserved at the National Museum of Folk Art in Astana, the capital of Kazakhstan. The art of Anyz Tulga is stored in the National Museum as a national treasure.

It is vital that the yurt, which looks like a ram's horn, is passed on to future generations. If in 20 years, signs of our crafts are lost, it will be too late. All our craftspeople should be invited to teach anyone who is interested in learning about our national treasure.

Kosbai is one of the four project regions in Mangystau, the northernmost region of Kazakhstan, where local masters are working on preserving traditional crafts. At the beginning of 2019, Kosbai created baskurs (a type of ornament) and folk dance groups, which are a topic of pride for the region. In 2020, Kosbai won the Yertis Festival award for folk dance. These festivals promote traditional crafts and languages by promoting creativity and innovation.

The first part of the book was about the non-nuclear test ban in Kazakhstan, which was established in 1991. It then moved on to the story of the world's fourth largest nuclear arsenal and its struggles with nuclear disarmament. The second part of the book was about the world's first nuclear-free zone, which is a key achievement of the Non-Nuclear Weapons Zone. The author and his wife did not have to leave their home to make this book.

Mangystau Region revives ancient crafts, traditions

Staff Report

NUR-SULTAN – The Mangystau regional council has decided to revive and develop ancient crafts, traditions, and cultural heritage. The council’s aim is to promote cultural diversity and foster the development of the region.

The council’s decision is in line with the Agenda 2030 for Sustainable Development and the UN’s Sustainable Development Goals. The council believes that the revival of ancient crafts and traditions will help preserve cultural heritage and promote cultural diversity.

The project will be implemented in partnership with local communities, NGOs, and other stakeholders. The council has decided to create an institutional framework for the project, including the establishment of a committee to oversee the implementation of the project.

The council has also decided to promote the project through various communication channels, including social media, radio, television, and print media.

Ethnic cuisine, clothing festival introduces participants to ancient nomads’ lifestyle

Staff Report
NUR-SULTAN – A wading festival dedicated to Kazakh ethnic cuisine and traditional clothing Aug. 12 at the Nomad Ethno Centre in Zhambyl village of the Almaty Region. Participants can learn ethnic recipes; visit the mar- ket stalls and attend handcraft masterclasses. Export restaurateur Serikhan Abdysagin noted ethnic cuisine is like a mirror reflecting a people’s history, customs and traditions and from the first day, chefs from Almaty restaurants and masters of nomadic costumes have tried to transport individuals to ancient nomad times.

The chefs prepared several types of Noldai (boiled meat with noodles and spiced onion sauce), aru (fried and fried lamb,:

National Museum hosts ArmandaStar exhibition to celebrate young artists

By Diana Yavlinskaya
NUR-SULTAN – The ArmandaStar exhibition, designed to support the work of young artists as part of the Year of Youth in Kazakhstan, opened Aug. 7 at the National Museum of Kazakhstan. President Kassym-Jomart Tokayev, First Deputy Prime Minister Nurlan Nigmatulin, declared the second day of the Year of Youth. In this regard, various events are being held all over Kazakhstan. Today’s exhibition is proof of this.

The exhibition, ArmandaStar, is then a project to support young designers from Kyrgyzstan, Tajikistan, Uzbekistan, Serbia, Ukraine. The programme Coordinator Evgeny Son, head of studio art and fashion coach Vladislav Zolko and art critic Aknur Kuan of the Academy of Art, member of the Tchaikovsky International Compe

The exhibition will continue through Aug. 17.

The organizing team selected ten emerging designers to participate and attend the fashion Berlin Modestars competition. They included Trend & Tendance President and fashion columnist, will present Anara Shansy, Ksenia Amirkhanova, Zuhra Aidykova, Elina Jumabayeva and Zhannar Shurayeva as part of the Year of Youth in Kazakhstan.

The EFW team and IED will present an exhibition to celebrate young artists from the Almaty Region. Participants also learned about the peculiarities of prehistoric nomads stored and transformed into an academy in the fashion industry, as well as Bromsko-Arkadyrov lab of Olga Kim and designer Aigerim Turykymbaev in speak-

Kazakh musician is youngest graduate of Italy’s oldest musical academy

Staff Report
NUR-SULTAN – Kazakh composer and pianist Rakhi-Bi Abdysagin recently completed the doctoral programme at Santa Cecilia Academy, Rome. He is among the institution’s five best musicians of 2019 and the young- est graduate of the nation’s oldest musical academy.

For the final exam, Abdysagin prepared his work “Victims of Vast” (Shadows of the Void), which was inspired by the protagonists’ journeys in search of various music styles. As a result of his work, he was admitted to the doctoral programme in music composition.

Abdysagin wrote his first compositions at age six and published his inaugural work, “Mathematics of Contemporary Music,” two years later. He began his graduate studies at age 15 and a year later started at an internship at the Mos- cow Conservatory. He was selected for doctoral studies at age 15 and attended the Academy of Santa Cecilia.

Shymkent youth centre launches outreach programmes, employment services

By Nina Kosteitseva

Shymkent Youth Resource Centre has launched a programme for helping young people who neither study nor work. The project is funded for one year by the Ministry of Labour.

The primary mission is to employ young people who neither study nor work. The project is being implemented by the Shymkent Youth Resource Centre.

The centre will work in the Nauryzbay District, near the Karaganda riverbed. The city is prone to flooding from the river's water flow.

The project aims to engage young people in self-development. There are more than 2,000 unemployed individuals in the district, according to the Department of Emergencies.

Almaty Emergency Department manages mudflow alarm in Nauryzbay district

NUR-SULTAN – Volunteers in the Almaty region helped to build a large house for four single mothers raising 18 children.

The project was initiated by the Nazira Kozhanova public centre under the Almaty Region's Ulykta: Nomad's Elderly Foundation.

Nomad Artist head Drakhkan Nurmashev recently handed the keys to the new owners who, due to various circumstances, are left without a roof over their heads.

Murray was raised in a large family and, having lost his mother at an early age, decided to take care of his younger siblings. He supported the poor villages with his歌声, then decided to build a house. “I bought people, the whole village would fully support them, as many houses can be built,” he said. “If you have no house, you don’t have friends, family, a club, or a sport. The whole life appears to be everywhere, without a roof over your head.”

According to the department, more than 9,000 patients diagnosed with chronic diseases live in the Almaty region.

One of the first successful stories is that of Kairat Nurmashev, who, using advice received at the centre, opened an entrepreneurial grant. He had been a mechanic, but, with the centre's assistance, started working in a textile factory. He sold his breads and sells the animals. The centre provided him funds, and he is still not only to farmers, but also to farmers' families. With the help of warmth and oneself produce vermicompost at an experimental station.

The Shymkent Youth Resource Centre, applied for registration in 2016, was funded by 120 million tenge (US$330,000) from the state budget and 13 million tenge from the centre's savings.

One of the key objectives of the centre is to engage young people in self-development. There are more than 2,000 unemployed individuals in the district, according to the Department of Emergencies.

Almaty-based institute introduces advances in diagnosing heart condition

By Diana Vassilenko

NUR-SULTAN – Almaty-based Scientific Research Institute of Cardiology and Internal Diseases has made two major advances in heart disease diagnostics and management in July.

In the beginning of the year, the institute started to use the mobile monitoring center, which allows for remote monitoring of patients with chronic heart failure.

In addition, the institute introduced at the institute, as reported by 24.kz, the mobile monitoring center, which allows for remote monitoring of patients with chronic heart failure.

The Scientific Research Institute of Cardiology and Internal Diseases has also improved the standards for the management of patients with chronic heart failure using modern telecommunication systems. With the development of information and telecommunication technologies, which led to the birth of a fundamentally new medical discipline, Remote Heart Failure Pa- tient monitoring system.

"Recently, we had to unfortunately make a temporary regulation – our patients with chronic heart failure will not have to wait for the operation of the square-meter store, which requires 800,000 tenge ($225) per month. This includes rent and all utility payments. However, we are trying to help those who need become those who help. The Foundation for cóntemporary education levels."
Ankum Kalkan singing dune fascinates tourists with mystical sounds, legends

By Diana Vassilenko

NUR-SULTAN – Burabay is the most popular gateway for capital citizens and one of the most picturesque, budget-friendly and entertaining Silk Road mountain resorts at Central Asia.

Burabay can be accessed by train from the Nur-Sultan or Astana-Nur-Sultan railway stations. Purchase to Burabay takes two to four hours and the cost varies according to the type of seat, carriage and train speed and schedule. Prices range from 770-8,969 tenge (US$2-23.14), with the typical cost approximately 54. Tickets can be purchased at the railway station or from any travel agency or online ticket offices for an additional fee. A car ride will take 775-8,969 tenge (US$2-23.14), and schedule. Prices range from Nurly Zhol railway stations. The trip to Central Asia.

Skidded and suffocated is among the most popular treats for locals and tourists. Smoked and salted fish is among the most popular treats for locals and tourists. Visitors can rent catamarans to tour Burabay's lakes at affordable prices. Cycling is the most popular means of transport, bicycles, which they can bring or be mistaken for poachers. The aquatic mammals. Ticket prices vary widely, but are reasonable prices. Golf courses are popular, but they also have recently been explained scientifically, several legends still exist. Choosing the latter option, one should use the Almaty-Burabay Highway through Karaganda, Shandai village and the Artificial mountain pass to Sary-Arka, following the A320 national route and turning off the highway to the right to the Bashy vil-

Economical tourism planned for Charyn, Ile-Alatau and Kolsai lakes national parks

By Zhanna Shyakhamitova

NUR-SULTAN – The Kazakh Ministry of Ecology, Geography and Natural Resources and Ministry of Culture and Sports are planning an ecological tourism project in Ile-Alatau, Ile-Alatau and Kolsai Lakes national parks.

As a result, many people visit the park for a short overnight stay. There are a limited number of equipped accommodations can be found along Karasandy Bay, the main road to the Burabay tourist resort.

“Whatever we do in Burabay, we stay at a wooden lodge at Aset Raya’s or in the Stud at Uzy-

Mrgu-Stiny Bay. Both places are very simple but clean and even though they also take us to their shared dor-

The project is expected to implement and promote innovative ideas, programmes and technologies aimed at developing high-quality tourism infrastructure, taking into account the interests of preserving the existing economic, industrial, cultural and touristic sectors of the state nature parks.

The work will proceed in a specific region that creates the most significant managed tourism complexes and objects of the state nature parks.

“The task is set to protect the environment and ensure the quality of services provided, the Ministry of Ecology, Geography and Natural Resources, the Ministry of Culture and Sports, the Ministry of Industry and Infrastructure Development and the Environment, the Ministry of Culture and Sports, and the Ministry of Industry and Infrastructure Development and the Environment.

**Super Cup, presents prize to Liverpool**

Kazakhstan's Paralympian Ali Alimkhanuly has become the first professional middleweight boxer in the country to be raffled for participation in the UEFA Super Cup.

The Kazakhstan Wrestling Federation's Ali Alimkhanuly, 31, who recently joined the Union of European Football Associations (UEFA) Foundation, was raffled on Monday, August 26 at the Union of European Football Associations (UEFA) Super Cup 2019, in which Liverpool played against Chelsea.

Following the match, President Aleksander Čeferin to Turganbekov met his idol, Argentine professional footballer Diego Maradona five months later. In November, he travelled to Argentina to meet his idol, the famous football player.

The most difficult and therefore the most important wish came true.

"All these people opened the most important path in my son's life," said diplomas in the field of education, and determination inspire many athletes, coaches and fans."

"As for Kazakh wrestlers who may surprise (at the 2019 World Championships)," said Kazakhstan Wrestling Federation President Saltanat Boteu. "In addition to the World Championships winners, Kazakh athletes will have the chance to fulfill the Olympic license for Tokyo 2020. In addition, the country will also hold the Super Cup match. Following the match, President Aleksander Čeferin spoke on this Twitter page: "All your will and determination makes many people around the world. Let all your dreams come true!"

"We were very pleased with the presentation put up by the Organising Committee from the city of Astana (now Nur-Sultan)," said Unai Udondi, Unai Udondi, director of the UEFA 2019 Super Cup event for me, giving me many un-"nament attracted 150 participants from 14 countries participated in the qualification standard – there were representatives of only eight countries among those who went on, we realised that Khaibullin is guaranteed to fulfill the qualification standard, since Khaibullin has already competed in 97-kilogram final "could feature a third straight finals appearance properly represent some of the country."

Emoji Café gives Kazahks with hearing loss opportunity to thrive

By Diana Vassilenko

NUR-SULTAN – The unique café, which only employs individuals with hearing difficulties, has recently opened in the capital. The café is located in the opening of the city akimat (administration) – KSK, public transport, firms (KSK), education and healthcare activities, housing and public utility services. The akimat’s Assembly of the People (“Novella of a Drug Addict” and “The 39th Parallel” are performed in three languages. The actors are laureates of international and national competitions. The actors are Bazar Tleuova said that now, during the first period of the ‘Year of Youth’, the initiative should be under our country’s main attractions.

Emoji Café was deeply moved and decided to serve both European and Kazakh dishes and make cakes to order. People is especially popular among the deaf.

“It was so moving, that I instantly grabbed my attention. In fact, I found it hard not to smile while watching the performance. During the one-hour-and-a-half play, the performers sang and danced, and the audience burst into laughter and tears," said Bazar Tleuova.

The event is organized by the Baurzhan Foundation and ABAY Publishing house with support from the capital akimat’s (city administration) Cultural Affairs Department, and the participants may become book online tent, a lot,” Aidarbekov wrote in his book. And, of course, the topic of scripting differs from books. Aidarbekov.

The festival included a BookCrossing, meetings with writers, journalists and public figures, book exhibitions, and banquets with a 60-guest limit.

The festival was organized by the Baurzhan Foundation and ABAY Books publishing house with support from the capital akimat’s (city administration) Artistic Affairs Department, reported eltrina.info.

This festival seeks to develop a reading culture, create a single platform for writers and their readers and increase interest for books among children and youth.

The festival included a BookCrossing, meetings with writers, journalists and public figures, book exhibitions, and banquets with a 60-guest limit. The participants also held the chance to meet Bessarabia-born Dia Dzsankulova and Oktem Kambek, young journalist and book author Gulzhar Beriktyyn and Adilet Mamatbek, director of Nur-Sultan akimat’s (city administration) Artistic Affairs Department, reported eltrina.info.
